

TENNESSEE DEPARTMENT OF HEALTH
Cancer Case Reporting Fact Sheet for Meaningful Use
For more information contact the Tennessee Cancer Registry

The Office of Cancer Surveillance, located within the Tennessee Department of Health (TDH), has programmatic oversight of cancer case reporting activities across the state. Currently, all Tennessee acute care hospitals, ambulatory surgery treatment centers, and pathology laboratories report cancer cases. The Office of Cancer Surveillance is expanding reporting capability to include eligible professionals under Meaningful Use 2 (MU2). Reporting under MU2 will provide expanded treatment information for cases and the identification of cases that were treated in a physician's office, not in a hospital.

The Centers for Medicare and Medicaid Services (CMS) Meaningful Use Public Health Menu Options and Core Items for Stage 1 and Stage 2 include:

Stage	Measure	Eligible Hospitals (EHs)	Eligible Professionals (EPs)	TDH Readiness
Stage 1	Immunization Registry Updates (Menu)	X	X	X
	Syndromic Surveillance* (Menu)	X	X	
	Electronic Laboratory Reporting (Menu)	X		X
Stage 2	Immunization Registry Updates (Core)	X	X	X
	Syndromic Surveillance* (Core)	X	X	
	Electronic Laboratory Reporting (Core)	X		X
	Cancer Case Reporting (Menu)		X	X
	Specialized Registry Reporting (Menu)		X
